This is all about formatting

We know that the internet is a wonderful place to visit but why
do some things on a web page catch our eye more than others. It
is because of the *formatting* and the **emphasis** of different
element to page.**Bold** italic <u>underlined</u> em and **strong** are all
tags that can be used for this task.

About

It can be intimidating for women to learn and ask questions when they are in an **extreme minority**. while open and welcoming, today's budding developer community is up to **91% male**. If we can empower more females with the confidence in their technological capabilities we *we can begin to change this landscape.*
